

MUIRWOODS

Every Mountain bike in the Marin range offers high performance. The Muirwoods is no exception and yet there's no high performance price.

The unique Marin ride is guaranteed with the oversize downtube stiffening and controlling the twist in the head tube and bottom bracket. Frames of this quality usually come on mountain bikes with a far higher price tag. Take a longer look at the Muirwoods. It's a lot of bike for less than you think.

TECH · SPEC
